

Touchless, safer.

daphne pv

by

We prevent airborne diseases

With **DAPHNE PV** we transform a pushbutton into a control surface responsive to contactless touch.

Potential virus and bacteria proliferation can be avoided by using **DAPHNE PV**. You don't push button, you simply approach your hand.

DAPHNE PV is a smart and efficient solution suitable for both new installation and retrofitting. **DAPHNE PV** is an add-on technology: easy to integrate and transparent for the machine control system.

How does it work?

1 **APPROACH THE HAND TO THE BUTTON**
BY KEEPING THE UPPER HALF UNCOVERED

2 **WAIT FOR LIGHT FEEDBACK**

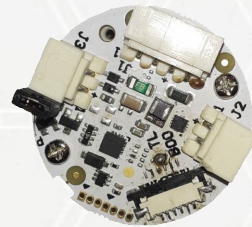

3 **REMOVE THE HAND**

Retrofit any system

CHOOSE the mechanical button you prefer

REPLACE the electronic board

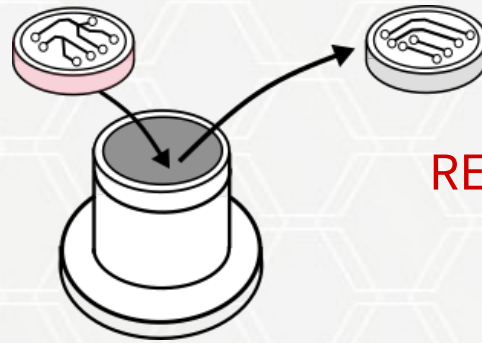

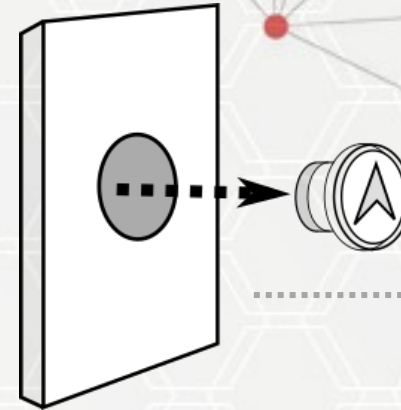

ADD a photovoltaic film

RIBES TECH will provide both the electronic board the photovoltaic film and all the support you need.

Easy to integrate

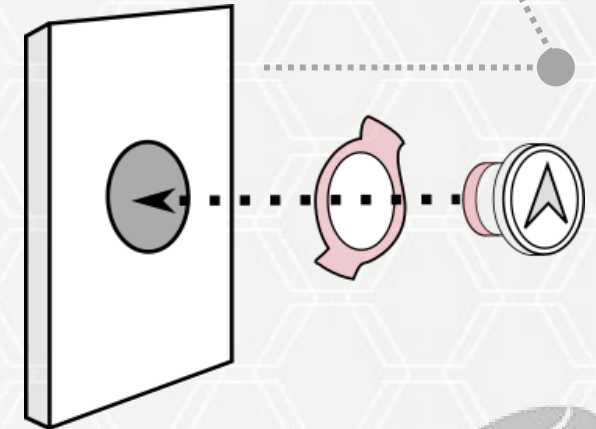

1 DISCONNECT AND REMOVE THE OLD BUTTON

2 REPLACE THE ELECTRONIC BOARD

3

MATCH THE BUTTON AND THE PV FILM, INSERT IT BACK IN THE PLATE AND RE-CONNECT THE BUTTON AS IT WAS.

Fully customizable on demand
